

KLüb[®]
Espresso machines

coffee, enriched through design

Technical features

- ◆ Stainless steel boiler.
- ◆ Four holes, omni-directional steam wands. Giving the Barista full control.
- ◆ Coffee delivery with both volumetric and manual switches options.
- ◆ Cup warmer tray.
- ◆ Low water level protection.
- ◆ Built-in volumetric pump and motor. Providing 8-10bar of pressure.
- ◆ Dual pressure gauge showing boiler and pump pressure.
- ◆ LED display for troubleshooting.
- ◆ 58mm delivery group outlet.
- ◆ Colour water level window, allowing instant monitoring.
- ◆ KLüb portafilter can use 7g, 14g, 21g filter cups.

Characteristics of KLüb

Stainless Steel Boiler

Allows you to deliver a truly exceptional espresso beverage every time.

Advanced Radial Group Head Design

KLüb's group head makes sure that the crema is extracted evenly from the coffee ground at all times.

Stainless Steel Heat Exchanger

An independent 500cc heat exchanger is provided for each group head.

Superior Thermostatic Stability

Independent laboratory tests have shown that the KLüb stainless steel boiler has superior thermostatic abilities when compared to similar traditional copper boilers.

Automatic Multi-function Detector

KLüb espresso machines are equipped with an automatic multi-function detector, which simplifies the trouble shooting process.

Dual Pressure Gauge

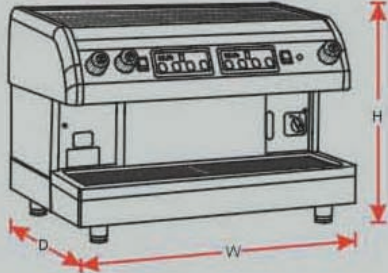

Water and steam pressure are continuously monitored and controlled. A dual pressure gauge indicates the boiler and motor pump pressure.

Power Surge Protection

All KLüb espresso machines are designed with superior power surge protection, this insures that the IC board is protected at all times.

Volumetric & Manual Switches

A programmable volumetric touch pad delivers a precise water dosage while manual control operation is provided for the creative Barista.
